

Using Foot Bolt Wrench for AMRS modules

We now have a wrench to easily adjust the foot bolts on our modules. They will be given out at the Oct 28 meeting. You may need to do some prep work on your foot bolts as shown below.

First, using a sharp knife, trim rubber coating away from square section of bolt.

Bolt should look like this . . .

Wrench is 1/4" Baltic Birch Plywood – looks like this . . . Slide wrench onto square shank of bolt and turn as needed.
